

AMENDMENTS TO THE CLAIMS

This listing of claims below will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-33.(Canceled)

34.(Previously presented) An apparatus comprising a cart adapted to carry a battery and a fluid supply, the cart having a first display to provide battery-related information, and a second display to provide fluid supply-related information.

35.(Previously presented) The apparatus of claim 34, comprising a patient treating accessory located on the cart, wherein the battery is configured to be coupled the patient treating accessory for supplying power thereto.

36.(Previously presented) The apparatus of claim 34, wherein the first display includes a first indicator configured to indicate the status of the battery charge level.

37.(Previously presented) The apparatus of claim 36, wherein the first indicator is a series of indicators forming a bar graph to indicate the status of the battery charge level.

38.(Previously presented) The apparatus of claim 36, wherein the first indicator flashes when the battery charge is low.

39.(Previously presented) The apparatus of claim 36, wherein the first display includes a second indicator configured to indicate the operating status of the battery.

40.(Previously presented) The apparatus of claim 39, wherein the second indicator is a series of indicators, each indicator representing a particular condition of the battery.

41.(Previously presented) The apparatus of claim 40, wherein one of the indicators is lit when the battery power is on.

42.(Previously presented) The apparatus of claim 40, wherein one of the indicators is lit when there is battery overload.

43.(Previously presented) The apparatus of claim 40, wherein one of the indicators is lit when there is no battery output power.

44.(Previously presented) The apparatus of claim 40, wherein one of the indicators is lit when service is required.

45.(Previously presented) The apparatus of claim 34, comprising a fluid port located on the cart and coupled to the fluid supply.

46.(Previously presented) The apparatus of claim 34, wherein the second display includes an indicator configured to indicate if the fluid supply is below a predetermined level.

47.(Previously presented) The apparatus of claim 46, wherein the indicator flashes when the fluid supply is below a predetermined level.

48.(Previously presented) The apparatus of claim 34, wherein the second display includes an audible alarm that sounds when the fluid supply is below a predetermined level.

49.(Previously presented) The apparatus of claim 48, wherein the second display includes an actuator to silence the alarm.

50.(Previously presented) The apparatus of claim 34, wherein the fluid supply is an oxygen cylinder.

51.(Previously presented) The apparatus of claim 46, wherein the fluid supply is an air cylinder.

52.(Previously presented) The apparatus of claim 34, wherein the cart includes an upwardly-facing top wall, and the displays are located on the upwardly-facing top wall.

53.(Previously presented) The apparatus of claim 34, wherein the cart is a mobile care cart.

54.(Previously presented) An apparatus comprising a cart adapted to carry a battery, the cart having an upwardly-facing top wall and a display located on the upwardly-facing top wall to provide battery-related information.

55.(Previously presented) An apparatus comprising a cart adapted to carry a fluid supply, the cart having an upwardly-facing top wall and a display located on the upwardly-facing top wall to provide fluid supply-related information.
